

Key Learning

Measurement

- Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels
- Compare and order lengths, mass, volume/capacity and record the results using $>$, $<$ and $=$
- Recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value
- Find different combinations of coins that equal the same amounts of money
- Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change
- Compare and sequence intervals of time
- Tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times
- Know the number of minutes in an hour and the number of hours in a day

Length

Weight

capacity

temperature

Statistics

- Interpret and construct simple pictograms, tally charts, block diagrams and tables
- Ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity
- Ask-and-answer questions about totalling and comparing categorical data

Make Tally Charts

A tally is a line/lines that represent an amount. Each line represents 1.

1		6	
2		7	
3		8	
4		9	
5		10	

When you get to a multiple of 5, the line is drawn across to create a group of 5.

Draw Pictograms (2, 5 and 10)

In some pictograms, the picture is worth more than one. There will be a scale on the pictogram to tell you what each picture is worth.

Red	
Yellow	
Green	

In this pictogram, each picture is worth 2.

Red = 6 Yellow = 8 Green = 4
